## CONSTANT VOLTAGE AND CONSTANT CURRENT CONTROLLER

### General Description

The MB3305 is a highly integrated solution for a constant voltage/constant current mode SMPS application.

The MB3305 contains one 1.21V voltage reference with  $\pm 0.5\%$  accuracy, one current sensing circuit and two operational amplifiers. Combining the voltage reference with one operational amplifier makes MB3305 an ideal voltage controller for use in adapters and battery chargers. The other low voltage reference combined with the other operational amplifier makes it an ideal current limiter for output low side current sensing.

The MB3305 is available in SOT-23-6 package.

### Features

- Constant Voltage and Constant Current Control.
- Precision Internal Voltage Reference.
- Few External Components.
- Easy Compensation.
- Low Supply Current: 0.5mA.
- Operating Temperature Range: -40 to 105°C

### Applications

- Adapters.
- Battery Chargers

### Absolute Maximum Ratings (Note 1)

Parameter	Symbol	Value	Unit
Power Supply Voltage	VCC	20	V
Input Voltage	VIN	-0.3 to VCC	V
Junction Temperature	TJ	150	°C
Storage Temperature	TSTG	-65 to 150	°C
Lead Temperature (Soldering, 5sec)	TLEAD	260	°C
Package Thermal Resistance (Junction to Case)	R <sub>θJC</sub>	92	°C/W

Note 1: Stresses greater than those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "Recommended Operating Conditions" is not implied. Exposure to "Absolute Maximum Ratings" for extended periods may affect device reliability.
